PROJECTS

Product Marketing Site – Gatsby to EDS Migration — Technologies: Adobe Franklin, Vanilla JavaScript, HTML, CSS, Adobe AEM, Edge Delivery Services (EDS)

- Migrated an existing Gatsby-based product marketing website to Adobe Franklin and Edge Delivery Services (EDS).
- Integrated EDS with GitHub repositories to fetch Markdown content and convert it into structured web content using the Dev Site Connector.
- Used AEM for content authoring and presentation, and built responsive, performance-focused UI components with vanilla JavaScript and CSS.

CIAM Admin – Rockwell Automation — Technologies: React.js, Next.js, JavaScript, HTML, CSS

- Built the frontend of a CIAM admin dashboard using React.js and Next.js, including role-based and location-based UI screens.
- Implemented interactive, responsive admin interfaces and frontend workflows aligned to project requirements.

Developer Blog – Ongoing Maintenance & Bug Fixes — Technologies: Vanilla JavaScript, HTML, CSS, Adobe Milo, Edge Delivery Services (EDS)

- Fixed front-end styling and layout bugs on the live Developer Blog by identifying whether the issue came from shared Milo components or blog-specific code, using browser DevTools.
- Tested fixes locally before deploying, keeping changes scoped to the blog so shared Milo components used across other sites weren't affected.
- Handled day-to-day bug tickets and styling issues to keep the blog stable and consistent post-launch.
