PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building responsive, performance-focused web applications and content-driven websites using HTML5, CSS3, JavaScript (ES6+), React.js and Next.js. Hands-on with Adobe Experience Manager (AEM), Edge Delivery Services (Franklin) and Adobe Milo, including reusable UI blocks, cross-browser fixes and content publishing workflows. Currently learning backend development with Node.js. Immediate joiner, open to relocation and remote roles.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Frontend: React.js, Next.js, Vanilla JS/CSS, Tailwind CSS, Bootstrap, Responsive Web Design, Component-Based UI

CMS / Platforms: Adobe Experience Manager (AEM), Edge Delivery Services (EDS / Franklin), Adobe Milo

Practices: Cross-Browser Compatibility, Reusable Component Development, Web Performance Optimization, Content Publishing Workflows, Debugging

Backend (Basics): Node.js (CRUD + Authentication), MongoDB

Tools: Git, GitHub, VS Code, Chrome DevTools, Agile/Scrum

KEY ACHIEVEMENTS

- Worked on a US-based product marketing website, supporting new features and campaigns.
- Built and customized reusable UI blocks using vanilla JavaScript and CSS.
- Published and maintained articles on a high-traffic Developer Blog.
- Improved page load speed through CDN-based content delivery.

PROFESSIONAL EXPERIENCE

MitrahSoft Software Solutions Pvt. Ltd. — Frontend Developer

Apr 2024 – Jul 2026 | Kovilpatti, Tamil Nadu

- Developed and customized 15+ reusable UI components using JavaScript, HTML, CSS, Adobe Milo and Edge Delivery Services (EDS).
- Built and maintained 200+ content pages and developer articles using Adobe Experience Manager (AEM) and EDS publishing workflows.
- Resolved 80+ responsive UI and cross-browser issues, ensuring a consistent experience across desktop, tablet and mobile.
- Delivered 5+ production-ready features including Hero video support, Author Pages, RSS generation and dynamic content rendering, improving the content publishing experience.

PROJECTS

Product Marketing Site – Gatsby to EDS Migration

Technologies: Adobe Franklin, Vanilla JavaScript, HTML, CSS, Adobe AEM, Edge Delivery Services (EDS)

- Migrated an existing Gatsby-based product marketing website to Adobe Franklin and Edge Delivery Services (EDS).
- Integrated EDS with GitHub repositories to fetch Markdown content and convert it into structured web content using the Dev Site Connector.
- Used AEM for content authoring and presentation; built responsive, performance-focused UI components with vanilla JavaScript and CSS.

CIAM Admin Dashboard – Rockwell Automation

Technologies: React.js, Next.js, JavaScript, HTML, CSS

- Built the frontend of a CIAM admin dashboard using React.js and Next.js, including role-based and location-based UI screens.
- Implemented interactive, responsive admin interfaces and frontend workflows aligned to project requirements.

Developer Blog – Ongoing Maintenance & Bug Fixes

Technologies: Vanilla JavaScript, HTML, CSS, Adobe Milo, Edge Delivery Services (EDS)

- Fixed styling and layout bugs on the live Developer Blog by identifying, with browser DevTools, whether the issue came from shared Milo components or blog-specific code.
- Tested fixes locally before deploying, keeping changes scoped to the blog so shared Milo components used across other sites were not affected.
- Handled day-to-day bug tickets and styling issues to keep the blog stable and consistent post-launch.
